

Christmas pendant: the same motif on both sides

Grid pattern: 24 x 28 cells. White dots remain empty. Square: 2.5 mm.

C: 24 per side / 48 for two sides

G: 264 per side / 528 for two sides

R: 18 per side / 36 for two sides

Y: 120 per side / 240 for two sides

C = cream, G = green, R = red, Y = yellow. No fixed DMC number.

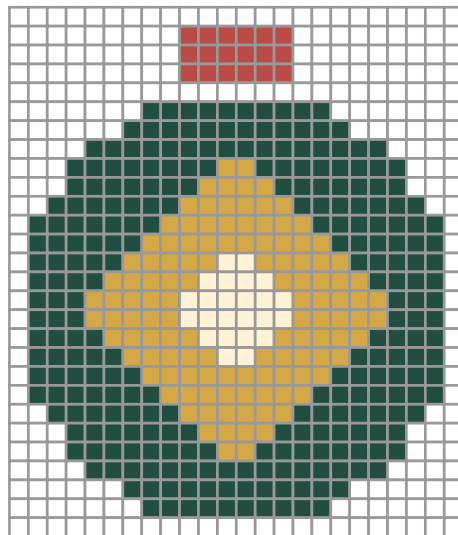

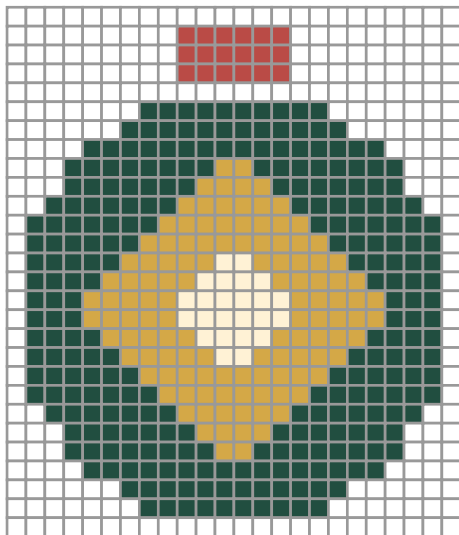

Make both copies with the red cap at the top. Left/right is symmetrical.

This is a flat pendant, not a pattern to cover a round bauble with.

Paper is not self-adhesive: choose matching adhesive material and base separately.

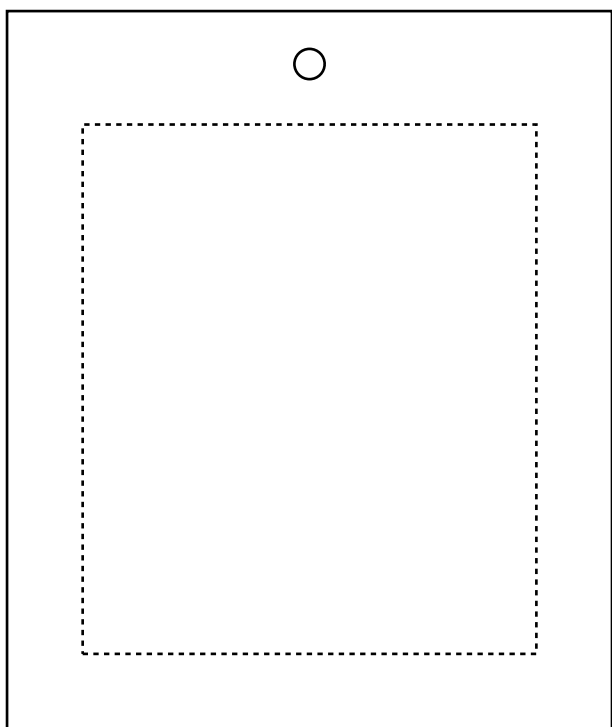

Size test: print at 100%

No fit to page. Each cell here is 2.5 mm; each grid 60 x 70 mm.

Both grids are copies, not reversed glue or transfer images.

Base suggestion: 80 x 95 mm. Top strip: 15 mm free.

Check line: measures 50 mm. Test the adhesion on your material first.
